Teacher AI Assistant

AI-powered reflection for better teaching.

Our mission: We help teachers improve faster by giving them instant, actionable feedback on their lessons.

The Problem: Teachers Lack Actionable Feedback

1

Infrequent Feedback

Classroom observations are rare, stressful, and often inconsistent.

2

Time Constraints

Teachers want to improve but have no time to analyze their own lessons effectively.

3

Blind Spots

Teachers are often unaware of critical teaching patterns: 0 questions asked, rapid pacing, no student engagement.

Introducing Teacher AI Assistant

"Upload an .mp3. Get a full teaching analysis in 30 seconds."

- **Strengths & Weaknesses:** Detailed insights

- **Engagement Metrics:** Student participation analysis

- **Pacing & Clarity:** Optimize lesson delivery

- **Actionable Next Steps:** Immediate improvement strategies

- **Global Rating:** Holistic performance score

Why Use Teacher AI Assistant?

Instant Feedback

Get comprehensive lesson analysis in 30 seconds, not weeks.

Daily Improvement

Actionable insights after every lesson, not just annual observations.

Objective Analysis

Research-based evaluation free from observer bias.

Time-Saving

No scheduling conflicts or classroom disruptions.

Personalized Coaching

Tailored suggestions based on your teaching style and subject.

Evidence-Based

Built on proven frameworks used by 3,000+ teachers.

This transforms teaching practice from reactive to proactive improvement.
